1. This report is the international preliminary examination report, established by this International Preliminary Examining Authority under Article 35 and transmitted to the applicant according to Article 36.

2. This REPORT consists of a total of 3 sheets, including this cover sheet.

3. This report is also accompanied by ANNEXES, comprising:

a. (sent to the applicant and to the International Bureau) a total of _____ sheets, as follows:

sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions).

sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. I and the Supplemental Box.

b. (sent to the International Bureau only) a total of (indicate type and number of electronic carrier(s)) _____ containing a sequence listing and/or tables related thereto, in computer readable form only, as indicated in the Supplemental Box relating to Sequence Listing (see Section 802 of the Administrative Instructions).

4. This report contains indications relating to the following items:

Box No. I Basis of the report

Box No. II Priority

Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

Box No. IV Lack of unity of invention

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Box No. VI Certain documents cited

Box No. VII Certain defects in the international application

Box No. VIII Certain observations on the international application

2. Citations and explanations (Rule 70.7)

Reference is made to the following documents

D1 : KR 1020010064740 A (KT Corp.) 11 July 2001

D2 : WO 00/72623 A2(Inc Integrated Network Co.) 30 Nov 2000

D3 : EP 0849890 A2(Globalstar L.P.) 24 Jun 1998

The current invention discloses an wireless internet access repeater and the method which comprising first transceiver for communication with wireless internet access through first communication mode, second transceiver for communication with user terminal through second communication mode, MAC transformation administrator for formatting first communication mode to second communication mode.

D1 discloses a method of detecting a shadow area in a radio communication system by multimedia signal which is capable of detecting shadow area in the cell. But D1 does not disclose the characteristic in current invention wherein the interference between signals with same frequency is eliminated by using the different communication modes.

D2 discloses a local access system with variety of interchangeable resource modules under the control of a management unit over common bus to provide a flexible interface for various network communication services. But D2 is for interfacing different network communication services, not for accessing the shadow area in the network.

D3 discloses satellite communication system comprising at least one low earth orbit first satellite, at least one second satellite, ground segment with plurality of user transceivers. But D3 is only for satellite communication system which does not disclose characteristic of accessing the shadow area in the network.

The current invention therefore appears to satisfy the novelty, inventive step and
